PathCraft - Implementation Log

Generated: 2025-08-09T00:16:20

Changes implemented:
- Added full Task CRUD endpoints (create/get/update/delete) in backend/api/tasks.py.
- Added completion-triggered notification in Task update endpoint.
- Mounted Teams router in backend/main.py (tags=teams).
- Removed duplicated calendar sync loop in backend/api/sub_goals.py.
- Scheduling: fresh DB query for tasks, conflict-safe fallback, placeholder task when none.
- Scheduling: fallback to keep existing plan when no better slot.
- Slot optimizer: safe defaults when slot_optimizer_model.json is absent.
- Reminder optimizer: fixed imports; supports None task_id.
- Notifications: create honors optional task_id; cleaned WebSocket send.
- API reference: documented Task endpoints.
- Requirements: added python-dateutil, python-jose[cryptography], httpx, starlette.
- Main: imported fastapi.status for WS close; included teams router.

Verification:
- Test suite passes: 19 passed (see tests/test_backend.py).
- Environment set via backend/requirements.txt.
